Mailcore Email Hosting

You Don't Need an Email Server!

Why bother with the expense of an email server, and getting the right people to maintain it, when you can host your email on our systems? More features and better protection with no implementation costs.

No Job Too Small (or Large!)

Accounts from one mailbox to one million - what's more, you can tailor your package exactly to your needs. MailCore offers a range of innovative features over many traditional email systems. Choose between all optional extras to create a custom package that's right for you.

- **Use Your Own Domain** - anything@yourdomain to your MailCore address, free. Included in all accounts.

- **Spam Filter** - Effective removal of junk and obscene emails. Included in all accounts.

- **White & Black Lists** - Exact control over who can send to your mailbox. Included in all accounts.

- **Virus Filter** - No more worms, trojans or other nasties. Optional Extra - Included in Group and Business Packages.

- **POP3 & IMAP Support** - The power of IMAP makes it ideal for business. MailCore is not a web-only service, POP3 is included in all accounts so you can use it with all popular email clients. We also offer IMAP - the ability to keep messages centrally and use server-based folders. POP3 Included - IMAP Optional Extra, Included in Business Package.

- **Multiple Mailboxes, Central Admin** - Easy administration, instant results.Manage all your mailboxes centrally or individually with our web-based control panel. Included in all accounts.

- **Outbound SMTP** - Safe delivery of email and optional virus protection. Unlike some email providers, you can use our servers to deliver email. If you take the Virus Filter option, we'll scan your outbound mail at no extra charge. Included in all accounts.

- **Free Mail Tools** - AutoReply, FetchMail, Aliases, Forwarding. All MailCore accounts come with a range of useful tools:

- **AutoReply** - Also known as 'Out Of Office'. Set up an email to be automatically sent to anyone contacting you while you are away.

- **FetchMail** - We're sure that after using MailCore you won't want to use any other service. FetchMail allows us to collect email on your behalf from other email accounts. One central email account for all your addresses!

- **Aliases** - You can have any number of aliases on your account. These are addresses that 'map' to a real mailbox. So, sales@ or info@ need not take up mailboxes. You can even have an alias delivered to more than one mailbox, creating mailing lists.

- **Forwarding** - Need mail in another place? If you can't get to your MailCore account, or maybe you need a copy at work, MailCore can copy or move email to an external address. Included in all accounts.

- **No Advertising** - You are protected by our privacy policy.

- Available through our network of Approved Partners

Thinking about Microsoft Exchange?

Thinking of buying Exchange for your organisation? Before you do, you may want to consider MailCore, or our Hosted Zimbra solution, as an alternative - let the experts remove the strain and reduce your costs!

For a small monthly charge, you now have a dedicated email team supporting your email services 24/7 and constantly improving the system making it smarter, faster and adding new features. What's more, you don't need a server, rack space, or a raft of costly software licenses and someone who knows how to support it all.

Archive your mail

Mailcore integrates perfectly with our MessageBunker email archiving service.
