

## Setting up MessageBunker with GMail

To get the best results with MessageBunker, you should always use IMAP access if it is available. Fortunately, with Gmail, IMAP is available, although over SSL only (which increases security, but can lead to confusion in the setup).

First step is to enable IMAP access for your Gmail account. To do this, first log into your Gmail account and click on 'Settings' in the top right corner:

Using MessageBunker with GMail

Click on 'Save Changes' and your work on the Gmail side is done. Now log in to the MessageBunker control panel, and click on 'Add Mailbox'.

In the 'Mail Server' box, enter, 'imap.gmail.com'. Select IMAP protocol, and tick the 'Use encrypted (SSL) Connection' box. Then enter your email account username and password to match your Gmail details:

nessagebunke	ř	You are signed in as adman I Control Pasel I Sy			
ontrol Panel	Add a Mailbo	x			
our Mailbox add Mailbox our Account	MessageBunker works by logging into your email account and making copies of all the email it finds there. To do this you need to tell us how to access the mailbox and where it is stored.				
account Settings est Connection	You can add another 4 mailbox	Yeu can add another 4 mailboxes.			
listory	About Your Mail Server				
ign Out	We'll need to be able to access changes to your firewall so we	your server using IMAP or POP3, so if it's a server you own, you may need to make allowed to connect.			
	Mail Server	imas gmail.com			
	Protocol	IMAP 🛟 🗹 Use encrypted (SSL) Connection			
		Using POP3? Make sure your client leaves messages on the server.			
	Port (Optional)				
		You only need to enter a port if you are not using the standard port for the chosen service (e.g. 143 for IMAP, 993 for IMAP with SSL).			
	Email Account Username Email Account Password Re-Type Password	apm1234567(bypoglemail.com
